

Teija, a mother to a 5-year-old girl, answers our questions about her family's experiences with Moomin Language School

How long has your child taken part in Moomin Language School?

My child has been in Moomin Language School for about half a year now.

In your opinion, which skills have developed with Moomin Language School?

Especially vocabulary has increased surprisingly fast.

How has your child experienced the service?

She likes it very much and doesn't want to be absent from kindergarten for any reason especially when there's a playful lesson. Luckily, it's possible to catch up in the learning application by doing several exercises on one go if she has to be away.

Do you notice your child's new language skills at home?

She tells us what new words she has learned, repeats them at home and asks us about them. She sings the songs and rhymes that she's learned during playful lessons. She's so enthusiastic that she's already learned the alphabet and numbers in English. She's also delighted when she spots familiar English words when watching TV or using the tablet.

What impression do you have of Moomin Language School?

The beginning was slightly challenging since the service was new to the kindergarten as well, but now that it's become more of a routine, we are very satisfied.

What would you like to say to parents who are considering taking part in Moomin Language School?

Moomin Language School is definitely a worthwhile investment in your child's future! At this age, learning seems to happen almost spontaneously.
